

Cyber Security Support Information Session

Introduction

Cyber is daunting for small businesses, charities, and sole traders. It's hard to know where to start, services can be expensive, and it's not always obvious who you can trust.

Of course, organisations may feel that they have bigger problems right now. But 39% of UK businesses were targeted last year by attacks, and if your computers were locked by ransomware next week and you couldn't trade, it might just be a final straw. There are simple steps you can take to stop this happening: the digital equivalent of putting a lock on your front door.

[The South West Cyber Resilience Centre](#) are a police/private not-for-profit partnership, funded by the Home Office, offering free and inexpensive cyber services for local SME's and third sector organisations to help them build their knowledge and confidence in staying safe online.

Who is it for?

This information session is designed for individuals who are keen to understand wider funded and free support available for SMEs and charities to develop their cyber security capabilities.

Session structure

This online bitesize information session is delivered by The South West Cyber Resilience Centre and will provide more detail about them as an organisation and the services you can access through taking up their free membership.

What will I get out of it?

- An overview of the South West Cyber Resilience Centre, the purpose and how they can work with you
- How to apply for your organisation's free membership with the SWCRC
- Details on free membership benefits, including:
 - Access to resources and toolkits from the National Cyber Security Centre
 - Cyber path student project support available for businesses
 - Personal advice and guidance for your business
 - Webinars covering key business topics on cyber
 - Provision of services for bespoke support or signposting to reputable companies for more in-depth support.
